SUMMARY

Senior Full Stack Developer with 6 years of experience in **Java, Spring Boot, Microservices, Agentic AI, AWS, Gen AI, Azure, Kubernetes, Kafka, and Angular**. Experienced in **designing, debugging, and implementing web applications and batch jobs, data pipeline optimization, asynchronous processing, cloud deployments, and testing**, while leading code reviews and driving Agile collaboration to deliver secure, high-performance enterprise solutions.

TECHNICAL SKILLS

Coding Languages: C, C++, Java (JDK 8, 11, 17), Golang, JavaScript, TypeScript, MATLAB, Python.

Web & UI Technologies: HTML, CSS, JSP, XML, SOAP, JSON, Apache FTL, jQuery, React.js, Angular JS, Material UI, Figma

Frameworks & Libraries: Spring Boot, Spring Batch, Spring Security(OAuth, Keycloak), JPA, WebFlux, Hibernate, Struts, JSF, Node.js, Apache Camel, myBatis, FastAPI, Flask, Servlets, Redux, JAXB (Marshalling/Unmarshalling), MCP Server.

RDBMS & NoSQL Databases: Oracle DB, MySQL, MariaDB, PostgreSQL, MongoDB, Cassandra DB, DynamoDB

DevOps & Cloud Platforms: AWS (EC2, S3, ECS, Lambda, CloudWatch, Route 53, VPC), Microsoft Azure (Key Vault, AKS), GCP, Docker, Kubernetes, Jenkins, GitLab (Pipelines, CI/CD), Maven, Gradle, JFrog, Sonar, Bitbucket, GitHub, Tortoise SVN, Dynatrace, Grafana, OpenTelemetry, ELK Stack (Elasticsearch, Logstash, Kibana), OpenShift Logging (EFK), Log4J

IDEs & Project Management Tools: Eclipse, IntelliJ, VS Code, Agile Methodologies, Confluence, JIRA, Mural.

QA Testing Frameworks: JUnit, Mockito, Spock, Jasmine, Karma, Cucumber (BDD), Postman, Playwright.

Domain Knowledge: Healthcare, Insurance, Capital Markets, Telecommunications, Retail, E-Commerce.

Core Concepts: NLP, Agentic AI, Langchain, Object-Oriented Programming (OOP), Functional Programing (Streams), Multithreading, Data Structures and Algorithms, Networking (TCP/IP protocols), OS Troubleshooting (Windows & Linux).

EDUCATION

Master of Science in Computer Science (Software Engineering & Data Science) | University of Missouri-Kansas City | Jan 2023 – May 2024 | GPA: 3.6/4

Bachelor of Technology in Electronics and Communication Engineering | Jawaharlal Nehru Technological University | Aug 2015 – May 2019 | GPA: 8.89/10

EXPERIENCE

Senior Full Stack Developer | AT&T | Plano, TX (Onsite) | Dec 2024 – Current

- Designed and developed six scalable microservices for commerce and account management systems using **Reactive Java, Spring Boot**, Spring WebFlux, and Project Reactor (Mono/Flux), applying Domain-Driven Design for asynchronous and event-driven processing.
- Built an **end-to-end data pipeline** migrating Oracle SQL data to **Cassandra DB**, integrating with **Apache Kafka** for event streaming and optimizing partitions/tombstones for high-volume reads/writes.
- Engineered a novel **Agentic AI** QA Automation System using the **Model Context Protocol (MCP)** Server and n8n orchestration to autonomously generate functional tests (Playwright, Karate) from Feature files, Swagger links, URLs, and Figma designs.
- Deployed & managed containerized apps with **Docker, Kubernetes, & Azure Cloud**, ensuring high availability.
- Leveraged **GitHub Copilot** to accelerate development, reduce boilerplate, and deliver more stories per sprint.
- Applied TDD and BDD practices by developing unit and integration tests in Spock and JUnit, achieving high code coverage, collaborating in code reviews, and mentoring peers to improve performance.
- Monitored application health on ELK Stack & Dynatrace to detect anomalies and troubleshooting issues in real-time, leading to faster issue resolution and improved system reliability.

Full Stack Developer | YSAT Solutions | Jun 2024 – Nov 2024

- Built new features for a financial client's capital market product using **Java**, Spring Boot, Spring JPA, and **AWS**, enhancing system functionality and user engagement.
- Enhanced and maintained batch jobs with Spring Batch, **AutoSys**, and **Airflow** on AWS, improving job reliability.
- Delivered front-end fixes in AngularJS, ensuring improved user experience and increased application usability.

- Explored Terraform for Infrastructure-as-Code to manage AWS resources, contributing to scalable infrastructure.
- Applied Test Driven Development practices by creating unit tests with JUnit/Mockito and integration tests on H2 in-memory database, leading to higher code quality and fewer bugs.
- Provided production support, resolving critical issues under tight deadlines and coordinating with stakeholders to maintain application uptime.
- Developed **regression test suites** with **Cucumber (Gherkin)** and conducted **manual end-to-end and disaster recovery (DR) testing**, ensuring smooth feature integration and system resilience.

Software Developer | American Bureau of Shipping (ABS) | Dec 2023 – May 2024

- Developed secure REST APIs with Spring Boot, Hibernate, & Spring Security to automate emails & notifications.
- Created **dynamic Jasper reports** (PDF, CSV) to support enterprise reporting needs.
- Integrated applications with **Apache Camel** to enable seamless system data flow.
- Integrated **Apache Kafka** for asynchronous communication between Spring Boot microservices, enabling real-time event processing and reducing service coupling.
- Migrated core services from **JDK 8/11 to JDK 17** using the **OpenRewrite Maven plugin**, modernizing codebases, and ensuring performance improvements and long-term support compliance.

Senior Java Developer | Infosys (Client: LG Electronics) | Aug 2021 – Dec 2022

- Built and optimized **batch modules** using **Spring Batch** with multi-DB setups, deployed on **AWS**.
- Migrated UI components from **FTL/JSP** to **Angular 11**, improving maintainability and speed.
- Enhanced **test coverage by 80%** with Jasmine and Karma for Angular applications.
- Improved batch processing performance, enabling higher throughput and improving client sales in **Google Merchant Center integrations**.
- Resolved critical cross-browser UI bugs to ensure a seamless user experience and increase user satisfaction.
- Documented **system designs, user stories**, and code functionality to support Agile teams and cross-functional collaboration, enhancing project clarity and team efficiency.

Software Engineer | Wipro Limited | Jun 2019 – Aug 2021

- Contributed to MedAdvantage360 and Member360 healthcare platforms by building scalable **Spring Boot microservices** integrated via **RESTful APIs** and enhancing front-end modules with **React and Redux**.
- Improved system resilience by implementing **Resilience4j** and **Hystrix** features including **circuit breakers, retries, rate limiting, bulkheading, and fallback mechanisms**, ensuring fault tolerance of critical services.
- Developed OAuth JWT Authentication module for secure access, enhancing data protection and user privacy.
- Created **Swagger** documentation for APIs, improving developer communication and cross-team adoption.
- Automated workflows using Python scripts for healthcare data analysis, reducing manual effort and increasing data processing efficiency.

Pre-Joining Intern | Wipro Limited | Feb 2019 – May 2019

- Developed hands-on projects using Java (Spring, Hibernate), Python, JavaScript, and SQL, enhancing software development skills and contributing to team projects

Intern | RC ALL Tech Power Systems Pvt Ltd | May 2018 – Jun 2018

- Developed a real-time water quality detector using a microcontroller and Wi-Fi module, integrated with a mobile app and cloud storage, enhancing data accessibility and monitoring efficiency.

PROJECTS

Nine Men Morris Digital Board Game – Built with **Java, JavaFX, and Agile SDLC**, hosted on Git.

Cloud-Based Traffic Monitoring – Designed a **Kafka + Spark** pipeline to process real-time and historical traffic data.

College AI Chatbot – Built with **NLP, TF-IDF, Cosine Similarity, Flask** for student Q&A automation.

Quantum Safe Algorithm (XMSS) – Implemented for **payment security** in secure communications.

CERTIFICATIONS

[AWS Certified Cloud Practitioner](#)

AZ-900 Fundamentals – Microsoft
